

## IAM Policy:

```
{
  "Version": "2012-10-17",
  "Statement": [
    {
      "Sid": "VisualEditor0",
      "Effect": "Allow",
      "Action": "account:*",
      "Resource": "*",
      "Condition": {
        "IpAddress": {
          "aws:SourceIp": "210.75.12.95/16"
        }
      }
    }
  ]
}
```

Here, we can mention the IP addressess or IP address range of the 10 freelancers in the Source IP

Next, we are naming this policy as FreelanceRange. This creates as IAM Policy to allow access to freelancers the AWS access within the organisation.

The IAM policy generated is given below:
